

1) Jira backlog with Epics and User Stories:

The screenshot shows the Jira PHRCMS board in the 'Backlog' view. The board is organized into columns for 'To Do', 'In Progress', and 'Done'. The backlog is filled with user stories, each associated with an epic. The epics are listed on the left sidebar: 'Consent Grant Management', 'Consent Revocation Management', 'Consent History & Monitoring', 'Automatic Consent Expiry', 'Medical Record Access Control', 'Consent Audit & Traceability', and 'System Performance & Response Time'. The user stories are listed in the main area, with their titles, priorities, and statuses. For example, the first epic 'Consent Grant Management' includes stories like 'PHRCMS-8 Select Verified Healthcare Provider' and 'PHRCMS-9 Select Medical Records for Consent'.

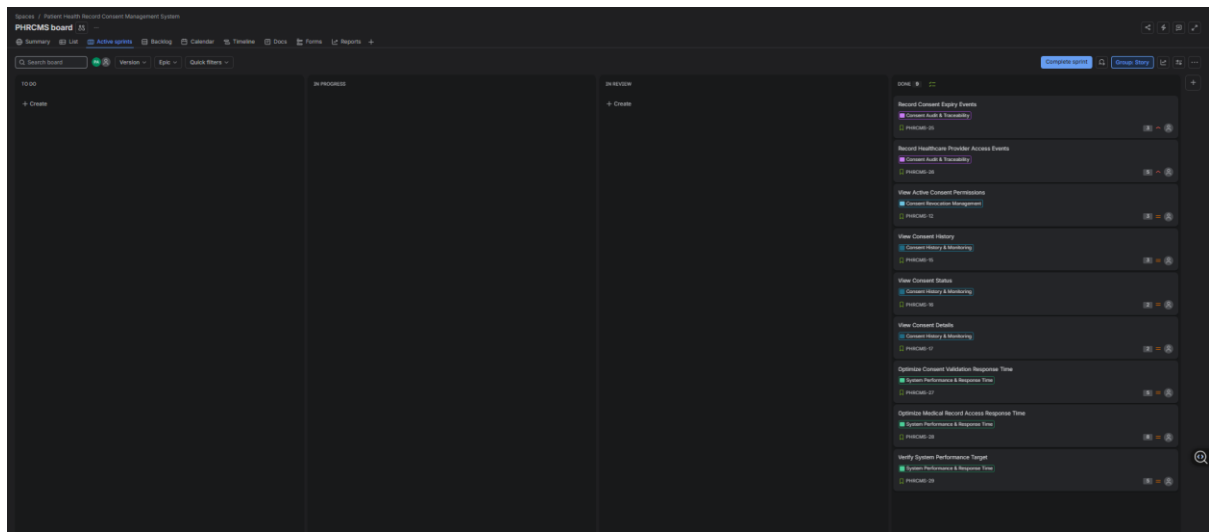

2) Lists of EPICS

The screenshot shows the Jira PHRCMS board in the 'List' view. The board is organized into columns for 'To Do', 'In Progress', and 'Done'. The list view displays a table of epics, including their names, assignees, reporters, priorities, statuses, resolutions, creation and update dates, and due dates. The epics are listed in the main area, with their names and details. For example, the first epic is 'PHRCMS-1 Consent Grant Management'.

3) Active Sprints Sprint 1

The screenshot shows the Jira PHRCMS board in the 'Active sprints' view. The board is organized into columns for 'To Do', 'In Progress', and 'Done'. The active sprints are listed in the main area, with their names and details. For example, the first active sprint is 'Sprint 1'.
